

Payment CSV Template

How to use CSV template in Online Banking Enterprise™

South Africa

FNB
First National Bank

how can we help you?

Payment Imports

You can import a Payment file which has been created off-line using the (.csv) spreadsheet provided by FNB Online or use the Bankserv (.txt) file directly from your own accounting package.

This guide will assist you with completing the relevant fields required in the Payment CSV template:

Step 1: Download the Payment CSV Template

Select the help icon “?” at the top of your screen. Scroll down to **File Formats and Online Templates** and select:

- **Payment CSV Template**

Once downloaded, you can enter all the required information and import the file directly into Online Banking Enterprise™.

Step 2: Complete the Payment Batch Header details in the CSV file

Field	Description
Column A2: Payment Action Date	Enter a valid 'Date' - The Payment Action Date. Date Format: DD-MM-CCYY Note: The action date selected is the date you require your recipients to receive their payments. Payments can be dated up to 365 days in advance. If the Action date is a Sunday or a public holiday, FNB recipients will receive their funds on the same day. Non-FNB payments will only be processed on the next business day, irrespective of the AutoBump settings.
Column A3: Own Account	Enter the appropriate Nominated Account Number.
Column B3: Hash Totals	A hash total is a mechanism for detecting errors. It is based on a total made up of unique entries that the system calculates and a set of rules (algorithm). In Online Banking Enterprise™, the hash total algorithm is used as a security feature to ensure data integrity. Your line of business application calculates the Hash Total value for the Payment or Collection file and populates it in the correct field as per the ACB or CSV file specification. This then calculates the Hash Total value at file import and evaluates it against the Hash Total in the file. Refer to the Online Banking Enterprise™ user guide to read more about Hash Totals.

Step 3: Complete the Payment Recipient details in the CSV file

Field	Description																						
Column A: Recipient Name	In this field list the names of the recipients you wish to pay. Note: These names serve as reference only and are not validated against the account number when the payment takes place.																						
Column B: Recipient Account	In this field list the recipient account numbers. - If a Public Recipient needs to be imported, then enter the Account Number of the Public Recipient. You can obtain the Public Recipient Description and Reference that must be used as the Account Number when importing Payments via the Payments/Collections or Recipient Tab > click on Menu > Select View Public Recipient. - If you are making payments to eWallets you must enter the 15 digit eWallet Account number. The 15 digit eWallet Account number can be any number in the range 000000000000001 to 999999999999999. You can enter the given digits and the zeros will be filled automatically. - If Money is Sent to the recipient's local cellphone number (via Send Money), use the valid "as is" cellphone number for the Recipient in the Recipient Account field. Note: This entry is limited to 20 characters.																						
Column C: Recipient Account Type	Enter the value that represents the recipient's account type in column C. <table border="1"> <thead> <tr> <th>Account Type</th><th>Value</th></tr> </thead> <tbody> <tr> <td>Public Recipient</td><td>0</td></tr> <tr> <td>Current (cheque/bond) account</td><td>1</td></tr> <tr> <td>Savings account</td><td>2</td></tr> <tr> <td>Transmission account</td><td>3</td></tr> <tr> <td>Bond Account</td><td>4</td></tr> <tr> <td>Subscription Share Account</td><td>6</td></tr> <tr> <td>eWallet Account (eWallet Pro)</td><td>D</td></tr> <tr> <td>eWallet Account (Send Money)</td><td>S</td></tr> <tr> <td>FNB Card Account</td><td>F</td></tr> <tr> <td>WesBank</td><td>W</td></tr> </tbody> </table> Note: Entry one value only.	Account Type	Value	Public Recipient	0	Current (cheque/bond) account	1	Savings account	2	Transmission account	3	Bond Account	4	Subscription Share Account	6	eWallet Account (eWallet Pro)	D	eWallet Account (Send Money)	S	FNB Card Account	F	WesBank	W
Account Type	Value																						
Public Recipient	0																						
Current (cheque/bond) account	1																						
Savings account	2																						
Transmission account	3																						
Bond Account	4																						
Subscription Share Account	6																						
eWallet Account (eWallet Pro)	D																						
eWallet Account (Send Money)	S																						
FNB Card Account	F																						
WesBank	W																						
Column D: Branch Code	In this field list the recipient's branch code. The universal branch code for the applicable bank will be acceptable. - When importing a Public Recipient, enter the value 0. - When making payments to eWallet recipients, please use the FNB Universal Branch Code:																						

	250655. Note: This entry is limited to 6 characters.
Column E: Amount	This field is used as the Recipient Amount on the system. Enter the Amount that you want to pay to the Recipient.
Column F: Own Reference	In this field enter the reference that you would want to appear on your bank statement when payments are made. Note: This entry is limited to 15 characters.
Column G: Recipient Reference	In this field enter the reference that you would want to appear on your recipients' bank statement. If you are making a payment to a company, ensure that you enter the correct reference. Note: This entry is limited to 20 characters.

Step 4: Complete the payment notification details in the CSV file

You may send a payment notification to a maximum of 5 email addresses, 2 SMSs and 2 faxes (any combination). Enter the appropriate email address, phone number and/or fax number to set up payment notifications.

Note: Fees are applicable for requesting payment notifications. Please refer to the pricing guide for more information.

To send a payment notification	
Via email:	-Enter Yes in the email notification fields (columns H, K, N, Q and T) -Enter the email address you wish to send notifications to in the email address field (columns I, O, P, R and U) -Enter the subject of the email notification in the email subject field (columns J, M, P, S and V)
To send a payment notification	
Via Fax:	- Enter Yes in the fax notification fields (columns W and AA) - Enter the first 3 digits of the fax number in the fax code field (columns X and AB) - Enter the remaining 7 digits of the fax number in the fax number field (columns Y and AC) - Enter the Subject of the fax notification in the fax subject column (these are columns Z and AD)
To send a payment notification	
Via SMS:	- Enter Yes in the SMS notify fields (columns AE and AH) - Enter the first 3 digits of the cellphone number in the SMS code field (columns AF and AI) - Enter the remaining 7 digits of the cellphone number in the SMS number field (columns AG and AH)

Step 5: Save the file

Once you have entered all the information on to the spreadsheet, save the file with a user-friendly name and make sure the file extension is saved as .csv

Step 6: Import the file

To import the CSV file select the **Payments tab**, select **Add Table Action** and then select **Import**.

The Payments Imports page will be displayed.

Add the Batch Header Details:

1. Type the name of the payment in the **Name** field.
2. Select the **.CSV** option from the **Import File Type** drop down list.
3. Select the **Statement entry** option as follows:
 - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
 - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.

Select the **Service type** from the dropdown list.

The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.

Select the folder from which payments must be made from the dropdown list in the **Folder** field or select **Once-Off**. The list of folders is restricted to those linked to accounts for which you can capture payments.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients by clicking on "cut-off times" hyperlink.

7. Click on **Continue**.

The Payment Import Details:

8. You have the option to **Ignore Invalid Items**.
 - If you click the **Yes** check box, the payment batch will be created containing only valid items.
 - If you click **No**, a payment batch will NOT be created if there are any invalid items in the import file.
9. The File Location field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
10. Select how you want to receive the results file. You can select to view the import results from your **Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email then complete the relevant address fields.
11. Select the **Format** from the dropdown and click on **Continue**.
12. Click on **Finish** to return to the Payments landing page.
13. Click on **Import Again** to return to the Capture Import Payment Details screen.
14. Check the **Import Results Report**.
